Milestone: STORY-003, 013, 014, 015 and 016 (R1 complete): shared checks

Five stories in one milestone, all demonstrated on the synthetic demo deployment, not in production: two-step verification at sign-in (STORY-003), the case manager, admin and leadership dashboards with the roles behind them (013 to 015), and API access policies decided by Open Policy Agent (016). With them, R1 is 11 of 11. Each story has its own evidence pack; this one holds the checks they share.

Checks

- Demo deployment (scripts/verify-deploy.mjs): the API and the site serve a40a63c; all 15 page paths serve the current build; database ok; 19 migrations applied (latest 019_access_policies.sql); 52 routes in the access table (46 before: the sign-in code step, three dashboards and two policy routes); all 28 protected GET routes refuse requests without a token; the audit log records the caller's own address.
- On the demo deployment as a synthetic citizen (scripts/verify-live-citizen.mjs): all 15 staff GET routes refuse it (403), and no staff links show.
- Accessibility, local (scripts/a11y/audit.mjs): 22 of 22 page and role combinations pass WCAG 2.1 AA checks (21 before this milestone's last page; 13 before the milestone), for citizen, case manager, administrator and leadership, plus the form, session-warning and sign-out checks.
- Unit tests: 719 passed in 18 suites (548 before STORY-016, 258 before the milestone). API end to end, local: 351 checks in 9 suites: access 33, workflow 26, compliance 30, freshness 16, audit 30, staff 60, dashboards 66, mfa 67, policy 23.

Screens

1. Every page passes the accessibility audit
2. Demo site: a citizen after the deploy
3. Demo site: the owner as administrator

Notes

- All data shown is synthetic.

1. Every page passes the accessibility audit

22 page and role combinations, including the MFA pages, the three new dashboards and Access Policies, pass the WCAG 2.1 AA checks.

Accessibility audit: 22 of 22 pages pass WCAG 2.1 AA checks

http://localhost:4173 · 2026-10-14 13:04 UTC · axe-core 4.10.2 (rules tagged wcag2a, wcag2aa, wcag21a, wcag21aa) in Chrome, plus keyboard, title, structure and 320 px reflow checks. Synthetic data.

Sign in, wrong password	Invalid email or password	0	0	no	0	Pass
Sign-in code, empty	Enter the 6-digit code from your authenticator app.	1	1	yes	0	Pass
Registration, empty	none	5	5	yes	0	Pass

Session about to end (WCAG 2.2.1 Timing Adjustable)

Warning shown 2 minutes before	axe issues	Modal, named and described	Focus on Stay signed in, kept inside	Escape extends: new 1-hour token, same sign-in time	No action: signed out, told why	Result
yes	0	yes	yes	yes	yes	Pass

Found in our own earlier work: sign-out from the UI

Logout button, then the audit log: sign-out recorded: yes; logged as a refused request: no.

What a screen reader is told about the registration form after an empty submit

Role	Accessible name	Description	Required	Invalid
textbox	Email Address	Email is required	yes	yes
textbox	Full Name	Full name is required	yes	yes
textbox	Password	Password is required	yes	yes
button	Create Account			
textbox	Social Security Number	SSN is required	yes	yes
button	Show			
button	Show date picker Show date picker	Date of birth is required		

Best-practice advisories (not WCAG failures)

None.

2. Demo site: a citizen after the deploy

The deployed demo site, signed in as the synthetic citizen the checks use: no staff links, and the release list shows R1 complete.

Release Progress

- ✓ R0: Secure registration and sign-in (hashed passwords and SSNs)
- ✓ R0: Compliance guards (demo-data banner, masked SSN entry)
- ✓ R0: Demo deployment online, with a managed database
- ✓ R1: Profile update with compliance check, and exemption eligibility with reasons
- ✓ R1: Case management: applications, review workflow, timeline, notifications, CSV export
- ✓ R1: Compliance validation: every decision checked against 8 controls, with reviews and an audit log
- ✓ R1: Data freshness: every update timed until it is readable, against a 30-second target
- ✓ R1: Security audit log: every sign-in, refusal, data access and change, write-once
- ✓ R1: Accessibility (Section 508): every page checked against WCAG 2.1 AA, by keyboard and screen reader
- ✓ R1: Citizen dashboard: applications, eligibility, case history and notifications in one place
- ✓ R1: Case manager dashboard: my cases, cases waiting on me, overdue, search
- ✓ R1: Admin dashboard: all cases, team performance, system health
- ✓ R1: Leadership dashboard: KPIs, trends, bottlenecks, team performance
- ✓ R1: API access policies (OPA): rules checked on every request, changeable without a deploy
- → R2 (next): AI and governance

3. Demo site: the owner as administrator

The owner's own screenshot after listing his case-manager address in ADMIN_EMAILS on Render: his account became the demo's administrator and sees the Admin Dashboard.
