STORY-014 Admin Dashboard, with administrator and leadership roles: evidence

STORY-014 works on the demo deployment, with synthetic data; it is not operating in production. An administrator's dashboard shows all cases (by status and by exemption type, as charts each followed by a table with the same numbers), open cases, decisions in the last 30 days and open compliance reviews; team performance per case manager (open cases, decisions, median days to decide, compliance pass rate); and system health (database and migrations, the deployed commit, data freshness against its 30 s target, compliance against its 99% target, access refusals in the last 24 hours, staff by role), each linked to its page.

Roles: citizen, case manager, leadership and administrator. In Staff Access an administrator gives and removes case-manager, leadership and administrator access; a case manager still gives only case-manager access and is refused the others. Never your own access, never the last case manager, never the last administrator. The first administrator comes from ADMIN_EMAILS, and only from people who already are case managers, so registering a listed address grants nothing.

Checks

- Evidence run, local: the admin dashboard shows all cases, the team and system health; Morgan gives Riley leadership access with a reason; Riley then holds the leadership role.
- API end to end, local (scripts/e2e/staff.mjs, 60 checks): an administrator gives leadership and administrator access; a case manager is refused both (403); the last administrator cannot be removed; every change is audited with who, why and the role.
- Demo deployment: after the owner listed his case-manager address in ADMIN_EMAILS on Render, his account became the demo's administrator (screenshot in the milestone pack).

Screens

1. Morgan's admin dashboard
2. Giving leadership access

Notes

- A person given a role must sign in again to see its pages; the API applies the change at once, and the notification says so.
- All data shown is synthetic.

1. Morgan's admin dashboard

All 12 cases by status and type, team performance for Dana and Sam, and system health. Compliance shows 'Below target' because one decision in the run was made without the required document, which opened a second-manager review.

Admin Dashboard

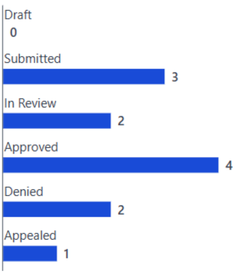

All cases, team performance and system health

Dashboard | Profile & Exemptions | Sign-in security | My Work | Case Management | Compliance | Data Freshness | Audit Log | Staff Access | Leadership | Admin | Access Policies | Logout

Demo environment. Synthetic data only. Do not enter a real SSN.

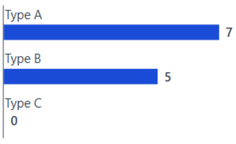

All cases	Open cases	Decided in the last 30 days	Open compliance reviews
12	6	3	1
	Not yet approved or denied	Approvals and denials	Waiting for a second case manager

All cases

Cases by status

Status	Cases

Team performance

Case managers and administrators. Decisions and the figures drawn from them cover the last 30 days.

Case manager	Role	Open cases	Decided	Median days to decide	Compliance pass rate
Dana Whitfield dana.whitfield@example.com	Case manager	4	1	9	100%
Morgan Lee morgan.lee@example.com	Administrator	0	0	—	—
Sam Ortiz sam.ortiz@example.com	Case manager	0	2	7	50%

System health

Read when this page loaded.

Database — OK
19 migrations applied, the latest 019_access_policies.sql.

Release — Commit local
The commit this deployment runs, as the health check reports it.

Data freshness — Within target
p95 is 8 ms against the 30 s target, over the last 24 hours (63 updates measured).
Data Freshness

Compliance — Below target
85.71% of 7 decisions passed every control in the last 30 days, against a 99% target. 1 review open.
Compliance

Access refusals — 0 in the last 24 hours
Requests turned away for no sign-in or no permission. Each is recorded in the audit log.
Security Audit Log

Staff — 3 people
2 case managers, 0 leadership, 1 administrator.
Staff Access

Access policy — Checked on every request
Open Policy Agent decides each request by role and by who owns or is assigned the record. Rules and routes can be changed without a deploy.
Access Policies

Release Progress

- ✓ R0: Secure registration and sign-in (hashed passwords and SSNs)
- ✓ R0: Compliance guards (demo-data banner, masked SSN entry)
- ✓ R0: Demo deployment online, with a managed database
- ✓ R1: Profile update with compliance check, and exemption eligibility with reasons
- ✓ R1: Case management: applications, review workflow, timeline, notifications, CSV export
- ✓ R1: Compliance validation: every decision checked against 8 controls, with reviews and an audit log
- ✓ R1: Data freshness: every update timed until it is readable, against a 30-second target
- ✓ R1: Security audit log: every sign-in, refusal, data access and change, write-once
- ✓ R1: Accessibility (Section 508): every page checked against WCAG 2.1 AA, by keyboard and screen reader
- ✓ R1: Citizen dashboard: applications, eligibility, case history and notifications in one place
- ✓ R1: Case manager dashboard: my cases, cases waiting on me, overdue, search
- ✓ R1: Admin dashboard: all cases, team performance, system health
- ✓ R1: Leadership dashboard: KPIs, trends, bottlenecks, team performance
- ✓ R1: API access policies (OPA): rules checked on every request, changeable without a deploy
- → R2 (next): AI and governance

2. Giving leadership access

As an administrator, Morgan chooses the role (Leadership) on Staff Access, gives the reason, and confirms in place.

Staff Access

Who can work cases, granted in the app and recorded

Dashboard | Profile & Exemptions | Sign-in security | My Work | Case Management | Compliance | Data Freshness | Audit Log | Staff Access | Leadership

Admin | Access Policies | Logout

Demo environment. Synthetic data only. Do not enter a real SSN.

Access is granted here by an existing case manager or administrator, never by registering. Case managers give and remove case-manager access; administrators also give and remove leadership and administrator access. Every change is recorded in the Security Audit Log.

Current staff

Name	Email	Role	Action
Dana Whitfield	dana.whitfield@example.com	Case manager	Remove access
Morgan Lee (you)	morgan.lee@example.com	Administrator	You cannot remove your own access.
Sam Ortiz	sam.ortiz@example.com	Case manager	Remove access

Give access

The person needs an account first. Case managers review and decide cases, so give access only to people who need it.

Email

riley.chen@example.com

Role

Leadership

Case managers work cases. Leadership sees totals and trends, never an applicant's details. Admins do both and manage access. To change someone from one role to another, remove their access first; a case manager or leadership person can be made an admin directly.

Reason

Program director: needs the totals and trends, not case files.

Required. Kept in the Security Audit Log with your name.

Confirm: give riley.chen@example.com leadership access?

Confirm access | Cancel
