STORY-015 Leadership Dashboard: evidence

STORY-015 works on the demo deployment, with synthetic data; it is not operating in production. A leadership user (a director) sees how the program is doing, never who is in it: total applications, approval rate, average processing time, open cases and appeal rate; applications and decisions per week for 12 weeks; bottlenecks (average days in each stage, from the case timelines, and how many cases are stuck in each for more than 5 days); and team performance by case manager.

Aggregates only: no applicant names, emails or other personal data reach this page or its API. Leadership does no case work: the case pages, the audit log and the admin dashboard refuse it.

Checks

- Evidence run, local: the leadership figures name no applicant (API and page); processing takes days as laid out (6.5 days on average); no case-work links show; Riley is refused the staff case statistics, the audit log and the admin dashboard (403 each).
- API end to end, local (scripts/e2e/dashboards.mjs): the leadership output contains no applicant email or name; KPIs and week buckets move as cases are decided.
- Accessibility: the leadership /dashboard and an admin's /leadership pass the WCAG 2.1 AA checks. Each chart is an image with a description, followed by a table with the same numbers.

Notes

- Case manager names appear in team performance, as the story asks; applicant data never does.
- All data shown is synthetic.

Bottlenecks

How long cases spend in each stage, from the case timelines, and how many are in a stage right now for more than 5 days.

Average days spent in each stage

Stage	Average days	Times measured	Stuck now (over 5 days)
Submitted to In Review	2	9	1
In Review to decision	4.9	7	1
Appealed to decision	—	0	1

Team performance

Decisions by each case manager to date.

Case manager	Decisions	Average days to decide	Approval rate
Sam Ortiz	4	7.8	50%
Dana Whitfield	3	5.7	66.67%
